

Latte Pro™

UNIQUE TECHNOLOGY

With the latest in globally patented technology, the original Latte Pro is an uniquely designed milk steaming jug with an integrated thermometer on both sides of the jug. The Latte Pro is highly functional, cost effective, attractive and user friendly.

PERFECT COFFEE EVERY TIME

The LCD display instantly reads the ideal temperature to serve milk for any style of coffee or hot drink. Create consistency your customers will love, and remove the need for messy probes that risk cross contamination.

VARIETY AND STYLE

The sleek design comes in Stainless Steel, Copper, Gold or Black to match your decor. The Latte Pro is available in 480ml, 600ml and 1 Litre sizes and also comes with colour coded grommets that fit into the handle for easy recognition of milk type.

LATTE ART PRO

The specially designed spout is shaped to showcase your best latte art skills and with a label each side it is suitable for left-handed or right-handed users. It's a must have for every professional barista and coffee lover.
