

MECHANIKA MAX II

The new Mechanika MAX II is a decisive step forward in espresso technology with refined control. Designed for easy, faster and more precise espresso experience built for everyday excellence.

BTC System

The integrated BTC System (Brew Temperature Control) enables precise temperature adjustments between each extraction. Combined with the advanced heated group head and optimized boiler layout, ensuring excellent thermal stability and precision in every cup.

Advanced one-way HX system to reduce thermal fluctuations.

The cartridge-heated group head ensures superior thermal stability.

Precise temperature control enables adjustment within 1°C.

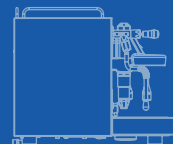

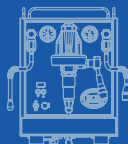

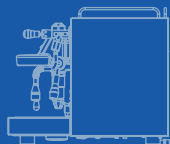

Fast Heat-Up Time

Ready to brew in just 12 minutes thanks to an advanced group head with cartridge heaters

OLED

OLED Control Display

Programmable pre-infusion, timers, and cleaning alerts, total control at a glance

MECHANIKA MAX II

Brew group	Cartridge-heated group head
Pump type	rotary
Fast heat-up mode	12 min
PID controller	•
Shot counter	•
Timer function	•
Valves	Quick steam lever valves
Water tank	Approx. 3 l
Switchable water tank / fixed water connection	•
Automatic water shortage shut-off	•
Volume stainless steel boiler	ca. 2 l
Boiler pressure gauge	•
Pump pressure gauge	•
Number of ECM portafilters	2
Weight	23.5 kg
Item number	CM10028-00 (polished)
	CM10028-01 (black)
